The issue is...

- Waste management has evolved beyond a mere operational concern; it now encompasses legal, financial, and reputational risks.
- The legal landscape is in a state of continual evolution.
- The administration of MOHU is intricate and requires considerable time.
- increased deadlines, additional actors, expanded data – diminished internal capacity
- The repercussions of an audit invariably impact the organization.

Many organizations recognize the necessity of addressing this issue, yet they are uncertain about where to begin and whom to entrust with the responsibility.

This is where AKSD plays a crucial role.

WHY THE AKSD?

Over 30 years of experience in a dynamic regulatory landscape.

WHAT DO WE PROVIDE?

Waste management governance and adherence

The regulatory landscape is perpetually evolving – we remain attuned to these changes. We offer comprehensive administrative and compliance support, ensuring that our clients need not concern themselves with deadlines, submissions, and regulatory responsibilities.

- **Identification of waste in accordance with the legal waste classification list.**
- **Site permit authorization**
- **Environmental licenses**
 - waste disposal
 - water legislation
 - acquiring air protection permits
- **Waste record management (EHIR system and internal documentation)**
- **Preparation and submission of annual and periodic waste reports.**
- **Data submission to authorities and coordinating entities**
- **Ongoing surveillance of legal modifications, compliance guidance**
- **Development and ongoing evaluation of internal waste management protocols**

Services prelated to MOHU Zrt.

The implementation of the Extended Producer Responsibility (EPR) system has rendered effective collaboration with MOHU Zrt. indispensable. We offer comprehensive assistance in this intricate administrative domain.

- **Finalizing MOHU registration and data reconciliation**
- **Current management of contractual and administrative obligations**
- **Monitoring orders, deliveries, and transactions**
- **Ongoing communication with the regional coordinator and collaborative partners**

Waste management directives and operational assistance

Coordinating operational tasks is a time-intensive endeavor that necessitates specialized knowledge. We commit to alleviating this burden for our clients while ensuring that processes remain transparent and well-documented.

- **Comprehensive oversight of waste management and order fulfillment.**
- **Professional management of external service providers (suppliers, operators)**
- **Preparation of performance certificates and supporting documentation**
- **Development of proposals for process optimization and cost reduction.**

Expert advice on environmental and waste management

You can rely on us even for intricate matters. With a technical approach and current legal expertise, we assist you in identifying the optimal solution.

- **Design and assessment of waste management systems**
 - **Development of onsite waste management solutions**
 - **Conducting environmental and sustainability assessments**
 - **Professional preparation and facilitation of official consultations**
 - **Environmental risk assessment and the development of remedial action plans**
-

Education, training, and awareness enhancement

Conscious waste management transcends mere compliance with regulations; it embodies a mindset. Through our training, we cultivate environmentally aware thinking across all tiers of the organization.

- **Waste management, environmental conservation, occupational health and safety, fire safety, and ADR/RID training for personnel.**
- **Internal training to ensure legal compliance**
- **Thematic professional workshops and training sessions**
- **Organization and execution of public and institutional awareness-raising initiatives**

Research, Development, and Innovation (R&D)

The future of waste management is grounded in the principles of the circular economy. We are actively engaged in the development of innovative solutions and the execution of pilot projects.

- **Preparation of waste reduction and circular economy initiatives**
- **Investigating and implementing innovative treatment, utilization, and monitoring solutions.**
- **Professional oversight and evaluation of pilot projects**
- **Collaboration with research institutions and institutions of higher education**

Why select us?

A.K.S.D. Ltd. is more than a service provider; it is a dependable, long-term professional partner that understands the sector's challenges and offers its clients tailored solutions.

Our advantage.

What significance does this hold for you?

Decades of experience in public service

Genuine understanding of the sector's particulars, rather than theoretical knowledge.

Practice-oriented engineering methodology

Practical, tangible solutions - not merely recommendations

Legislation-oriented, customer-centric approach

Adherence to official standards, effortless daily management

A complex portfolio managed by a single entity.

Comprehensive service, reducing your coordination burden.

Adaptable, tailored cooperation

You pay solely for what you genuinely require.

Presence in Debrecen, availability across the nation

Local expertise and prompt action supported by an extensive professional network.

Városgazdálkodási Kft.

Felelősséggel a mindennapokban.

To whom do we recommend our services?

- Local governments and financial authorities - to meet their waste management responsibilities.
- Industrial and commercial enterprises must develop effective internal waste management systems.
- Institutions and public entities - for training and compliance activities
- Organizations pursuing sustainability objectives for circular economy initiatives

With A.K.S.D. Ltd., you not only address a challenge,
**BUT YOU ACQUIRE A DEPENDABLE PARTNER
WHO ALSO CONSIDERS THE FUTURE**
